# XL PLEATED + CELLULAR SHADES MEASURE INSTRUCTIONS

ORDER IN 4 EASY STEPS

1. Select Mount Type:
Inside:
• Mounted within the window frame
• Provides a clean, built-in look
• Great way to leave attractive woodwork exposed
• If window frame isn't deep enough, please select outside mount

Outside:
• Great option when there is not enough depth for an inside mount
• Mounted to the wall, ceiling or molding surface surrounding the window
• Often used to make the window appear larger or to hide a less attractive window or door
• No minimum depth requirement

2. Measure:

Inside:
STEP 1: Measure the inside width at 3 locations – the top, middle and bottom. Record the smallest of the 3 measurements. This is your ordering width. We will make the necessary deductions (approx. ¼" – ⅜")
STEP 2: Measure the height at 3 locations – the left side, middle and right side. Record the largest of the 3 measurements. This is your ordering length.

Outside:
STEP 1: Measure the width of the area you wish to cover. If space allows we recommend adding 2–3" (1– 1½" each side) to this measurement to help eliminate light seepage. This is your ordering width and will be the overall measurement of the shade.

STEP 2: Measure the height of the area you wish to cover. This is your ordering length.

3. Select Control Type:

Standard Cord Lock:
• Allows you to raise and lower shade and lock in place
• As shade is raised, cord length increases
• Cleat included to wrap cord around for clean look and child safety
• No charge

Continuous Loop Control:
• Continuous cord allows for easy operation
• The cord always remains the same length no matter what position the shade is in
• Makes operating larger shades easier
• Surcharge applies

Cordless:
• Eliminate exposed cords
• Easy to adjust by lifting or lowering the shade with a gentle push or pull on the bottom rail
• Eliminates danger of dangling cords to children and pets
• Surcharge applies

4. Select Control Position: Left or Right

• This is the side of the shade that your control will hang from (left or right)
• Consider any obstacles that may interfere with operation (door handle, window opener, furniture location, etc.)
Mounting Requirements:

Product	Minimum Depth to Install	Minimum Depth for Flush Mount	Minimum Space for Outside Mount
with cord lock	⅝"	2⅜"	⅝"
with continuous loop	⅞"	2¼"	1¾"
with top down bottom up	⅝"	2⅜"	⅝"
with cordless system	⅞"	2¼"	1¾"

+ Optional Features:

Top Down / Bottom Up:
• Dual operation allows you to control privacy while still allowing light in
• Shade can be lowered from the top down and raised from the bottom up
• Not available with continuous loop control
• Surcharge applies

2 Shades on 1 Headrail:
• 2 shades hang from the same headrail and operate independently
• Total width you provide will be divided equally making both shades equal size (contact us for special requests)
• Small gap (approximately ½") will exist between the 2 shades
• Surcharge applies
• Controls will be positioned on the outside of each shade
• Available with standard cord lock only
• Not available for XL Pleated Shades
